manyhouses: Marketing Plan | خطة التسويق

Our entry in the Marketing category of the Afro-Asian Forum for Technology and Innovation, 2026.

1. Executive Summary | الملخص التنفيذي

Field	Value
Brand	manyhouses
Category	Real estate listings, Egypt
What it is today	A working web app (prototype) with 12 sample properties in 10 Egyptian cities
Live app	https://many-houses.streamlit.app
Launch	Nationwide, with a near-zero, organic budget
The ask	Try the app, and brokers and owners: list your first real homes with us
Contact	WhatsApp / phone +20 100 147 9499 · many.houses1@gmail.com · Kafr El Sheikh, Egypt
One-line pitch	manyhouses puts homes from Alexandria to Aswan in one simple search.
Team	Yassin Al Ashry, Techno Future Academy, Kafr El Sheikh: the app, the research and this plan

2. Situation Analysis | تحليل الوضع

The market | السوق

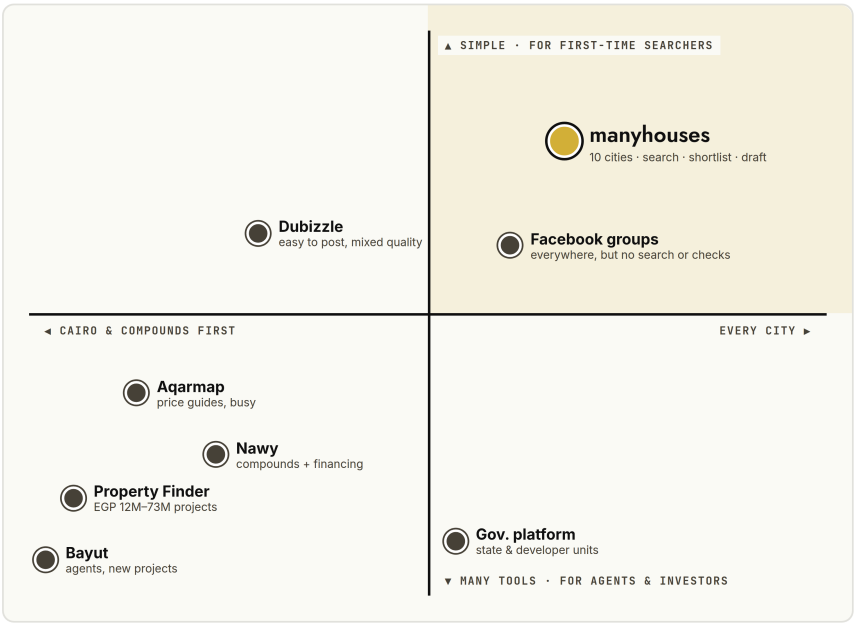

Fact	Number	Source
People living in Egypt	108 million (Aug 2025)	CAPMAS [1]
Marriage contracts	936,739 in 2024	CAPMAS via the press [3], [4]
Internet users	98.2 million, 82.7% of people	DataReportal [5]
Social media users	51.6 million	DataReportal [5]
Residential market size	US$9.81 billion in 2025, about 9% growth a year. One estimate; others are much higher.	Mordor Intelligence [9] (check)
Top-20 developer sales	About EGP 1.6 trillion in 2025, but 7% fewer units	EnterpriseAM [11], Zawya [12]
Market direction	Top-10 developer sales fell 6.5% in Q1 2026	Daily News Egypt [13]
The pound	About EGP 31 → about EGP 50 per US$ on 6 Mar 2024	Reuters via Arab News [16]
Money from Egyptians abroad	US$36.5 billion in FY2024/25, a record	CBE via Daily News Egypt [20]

What it means for us. Many people need homes, and nearly everyone is online. The big portals and the money behind them sit in Greater Cairo compounds. On Dubizzle, about 157k of the 200k+ property ads are in Cairo [37]. When we checked on 17 Oct 2026, Aswan had only 6 ads on Dubizzle and 11 for sale on Aqarmap [57]. Property Finder's featured projects cost EGP 12.4M–73.5M [32].

Competitors | المنافسون

Where we stand موقعنا بين المنافسين

POSITIONING MAP · OCT 2026

OUR SPACE

Simple, and every city

The big portals compete for Cairo compounds and agents. manyhouses starts simple, in the cities they leave out.

WHY THE DOTS SIT THERE

- Dubizzle: about 157k of its 200k+ property ads are in Cairo [37].
- Property Finder's featured projects cost EGP 12.4M–73.5M [32].
- Nawy lists compounds from about 150 developers [25].
- The government platform starts with 3,000+ units in New Alamein [23].

Checked on 17 Oct 2026: Dubizzle showed **6** property ads in Aswan and Aqarmap **11** for sale, against about **157k** on Dubizzle in Cairo [37], [57].

[n] = source number in docs/research.md

	Aqarmap	Property Finder EG	Nawy	Dubizzle EG	Facebook groups	manyhouses
Type	Portal	Portal	Brokerage, portal and finance	Classifieds	Social groups	Prototype
Makes money from	Pro subscriptions, ad packages [29]	Agent subscriptions [35]	Sales and financing [25]	Featured ads [42]	Boosted posts	Not yet
Size (company claims)	247k listings [28]	Group: US$525M stake [34]	US$52M Series A [25]	200k+ ads [37]	51.6M reach [5]	12 sample listings
Focus	Cairo, compounds	New projects, agents	Compounds	Everything	Local, informal	10 cities, simple
Gap we can use	Busy, prices not public	Expensive end	Few flats outside compounds	Mixed quality	No search, no checks	—

Two more to watch: **Bayut Egypt** (launched Oct 2023 [40]) and the **government platform** (launched Feb 2025 to remove duplicate and fake listings [24]).

SWOT | تحليل نقاط القوة والضعف

SWOT نقاط القوة والضعف والفرص والتهديدات

INSIDE: THE APP · OUTSIDE: THE MARKET

S — Strengths نقاط القوة

- 10 cities from day one, from Alexandria to Aswan and Siwa
- Simple: search, details, map, favorites, all without signing up
- A contract draft to read before meeting a broker
- Costs nothing to run: one free library and free hosting

W — Weaknesses نقاط الضعف

- 12 sample listings, and the photos are random placeholders
- Prices show in $, not EGP. Nothing is checked or verified yet
- No real accounts. Favorites end when the tab closes
- Contact us sends nothing, and the app can't count visits

O — Opportunities الفرص

- 936,739 marriage contracts in 2024: new homes needed [3]
- Small cities are thin on the big portals [37]
- Trust is a known problem; even the government is fighting fake listings [24]
- 98.2M internet users [5] and US$36.5B sent home from abroad [20]

T — Threats التهديدات

- Rich rivals: Property Finder (US$525M stake) [34], Nawy (US$52M) [25]
- A free government platform [24], and Facebook groups cost nothing
- The market is cooling: top-10 developer sales −6.5% in Q1 2026 [13]
- One fake listing could break trust in a new name

[n] = source number in docs/research.md · Weaknesses are listed in the README's Limits section.

3. Target Audience | الجمهور المستهدف

Who is it for? لمن هذا التطبيق؟

BUYER FIRST · BROKERS AS PARTNERS

PRIMARY · BUYER

Mona, 27
Teacher in Aswan, engaged, looking for a first flat

WHY NOW
936,739 marriage contracts in 2024. Most new couples need a home [3].

PAIN TODAY
Facebook posts hide the price ("السعر في الخاص"), and brokers show her flats one visit at a time.

MANYHOUSES GIVES
Price, rooms and area on every card. A favorites shortlist to show her family.

WHERE TO REACH HER
Facebook groups for flats in her city, and engagement and wedding pages.

LATER · BUYER ABROAD

Karim, 34
Engineer in Riyadh, buying a home back in Egypt

WHY NOW
Egyptians abroad sent a record US$36.5 billion home in FY2024/25 [20].

PAIN TODAY
He cannot visit flats from abroad, and he has to trust a stranger's photos and a broker's word.

MANYHOUSES GIVES
Photos, a map and the key numbers in one place, and a contract draft to read before he flies home.

WHERE TO REACH HIM
Facebook groups of Egyptians in the Gulf, Instagram, family back home.

PARTNER · SUPPLY

Hassan, 45
Local broker in Luxor with 20 flats to rent or sell

WHY NOW
Big portals focus on Cairo. Dubizzle has about 157k Cairo property ads out of 200k+ [37].

PAIN TODAY
His listings get buried in Facebook groups, and big portals charge agent subscriptions [35].

MANYHOUSES GIVES
His city on equal footing with Cairo, and the first partner spots (see Business model).

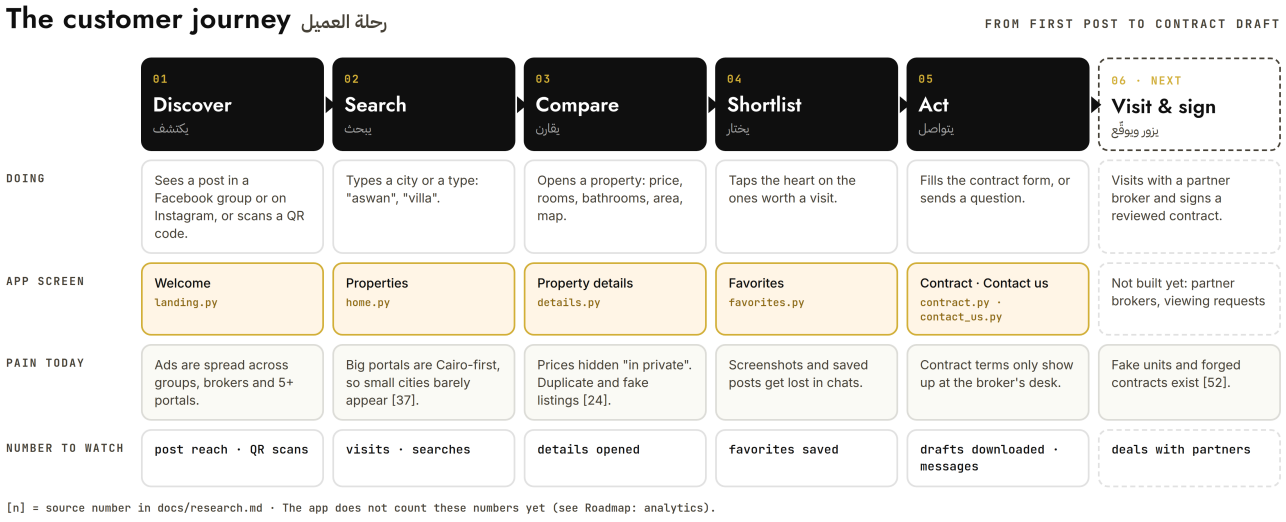

WHERE TO REACH HIM
A visit to his office with a QR flyer and the live demo on a phone.

We start with Mona and Hassan. Mona is the buyer we market to first, and Hassan brings the real listings she is looking for. Karim comes later, once the listings are real.

[n] = source number in docs/research.md · Names and ages are examples, not real people.

- **Primary audience:** newly married couples looking for a first home outside Cairo (Mona). 936,739 marriage contracts were signed in 2024 [3]. Egyptians abroad (Karim) come later, once the listings are real.
- **Partners:** local brokers and owners (Hassan). They bring the first real listings.

Customer Journey | رحلة العميل

4. Positioning & Brand | التموضع والهوية

Positioning statement. For young couples and families looking for a home outside Cairo, manyhouses is the property search that covers every city simply. It shows the price, rooms and area up front, keeps a shortlist, and drafts the contract. Big portals focus on Cairo compounds and agents.

Brand element	manyhouses
Tagline	Every city. One search. (Arabic: بيتك في أي مدينة)
Mark	A house outline whose wall turns into a key (`images/many_houses_logo.jpeg` , redrawn as `docs/assets/mark.svg`)
Colours	Gold `#D4AF37` , ink `#111111` , cream `#FFF8E7` (the app's `.streamlit/config.toml`)
Fonts	Jost for headlines, Inter for body text, IBM Plex Sans Arabic for Arabic
Voice	Clear · warm · honest
Name story	Many cities, many homes, one place to search. The name says what the app does: it puts houses from all over Egypt side by side, not only the ones in Cairo. The key in the house mark is the promise at the end of the search.

The full brand guide is `docs/brand/manyhouses-brand-guide.pdf` .

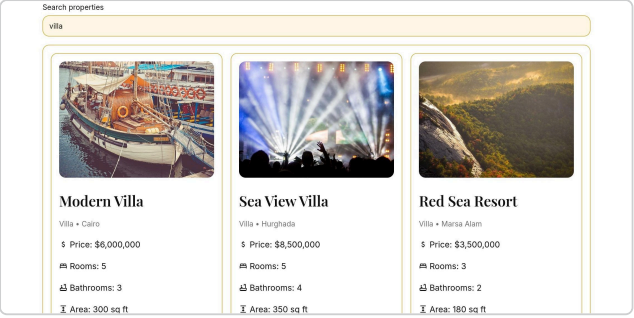

5. Marketing Mix (4Ps) | المزيج التسويقي

Product | المنتج

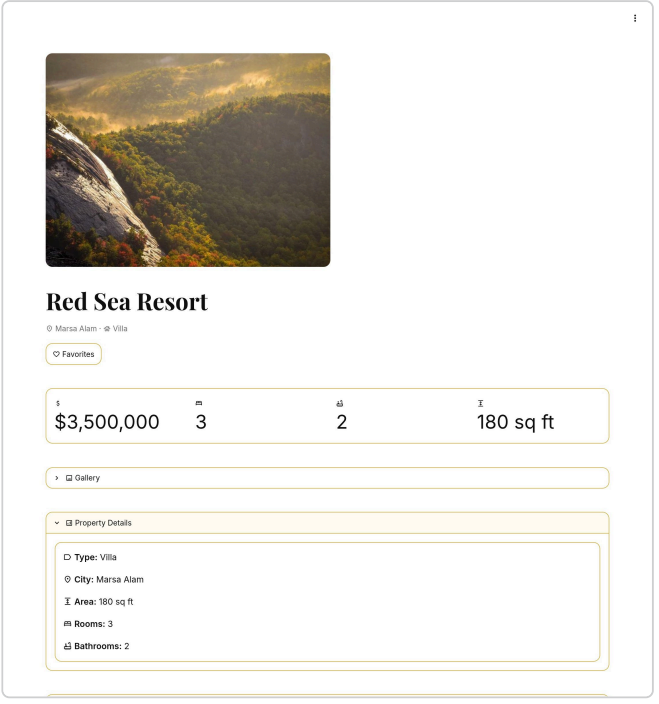

What the app does today, from its code:

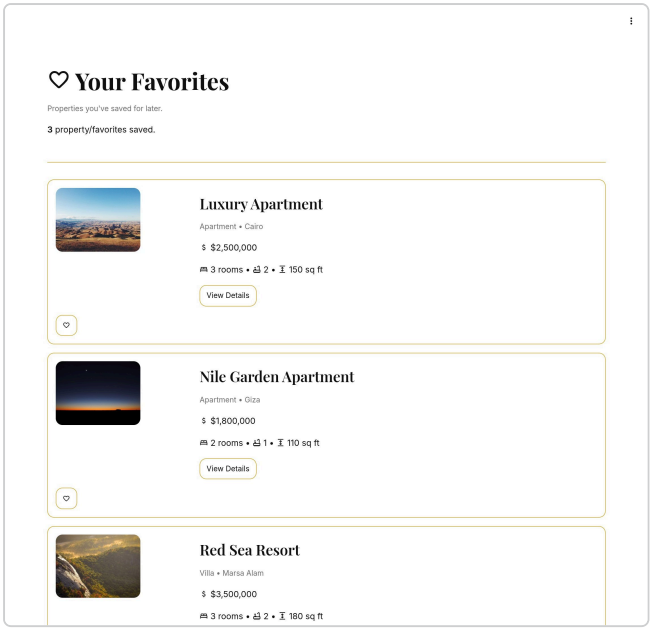

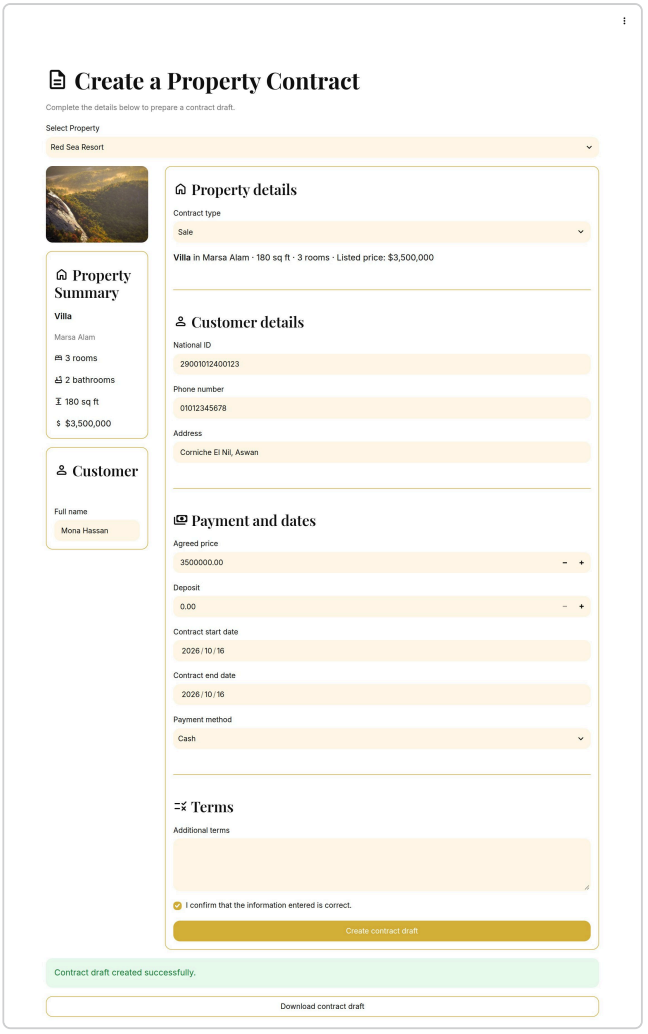

#	Feature	What it does	Screen
1	Search	Finds properties by name, city or type. Shows a friendly message when nothing matches.	Properties (`app_pages/home.py`)
2	Property cards	Photo, type, city, price, rooms, bathrooms and area, three cards per row	Properties
3	Property details	Four key numbers, a details box and a map pin	Property details (`app_pages/details.py`)
4	Favorites	Heart buttons on cards and details. One page lists them all, with remove buttons.	Favorites (`app_pages/favorites.py`)
5	Contract draft	Sale or rent form. Checks the name, national ID and phone, that the end date is not before the start date, and the confirm box. Then you download a `.txt` draft.	Contract (`app_pages/contract.py`)
6	Contact form	Checks the name, email and message, then says thank you	Contact us (`app_pages/contact_us.py`)
7	Information pages	Welcome, FAQ (8 questions), About	`landing.py`, `faq.py`, `about.py`
8	Sign in / Register	Check that the boxes are filled, then open the listings	`login.py`, `register.py`

Search "villa"

Property details

Favorites	Contract
	

Price | السعر

Searching is free. How manyhouses will earn money:

Option	How it works	Good	Hard
A. Featured listings	Free to list, pay to be pinned at the top of a city	Easy to explain, like Dubizzle [42]	Earns only once there is traffic
B. Founding partners	The first brokers in each city list free for 6 months, then pay a small monthly fee	Brings real listings now, and recurring income later, like Property Finder [35]	Brokers must see leads first
C. Success fee	No fee to list; a share of the broker's fee when a deal closes	Low risk for brokers	Hard to track; check the broker rules [45]

`research.md` recommends starting with B, then adding A.

Our choice: B first, then A. Founding partners bring the real listings we need now and cost them nothing to try. Once people visit, featured listings are easy to sell.

Place | المكان

- **The web app** at https://many-houses.streamlit.app. It works in a phone browser, and browsing needs no account.
- **Where people meet us:** Facebook groups, Instagram, brokers' offices, and events (see Promotion).
- **Coverage:** 10 cities: Cairo, Giza, Alexandria, Hurghada, Sharm El Sheikh, Marsa Alam, Luxor, Aswan, Siwa and the New Administrative Capital.

Promotion | الترويج

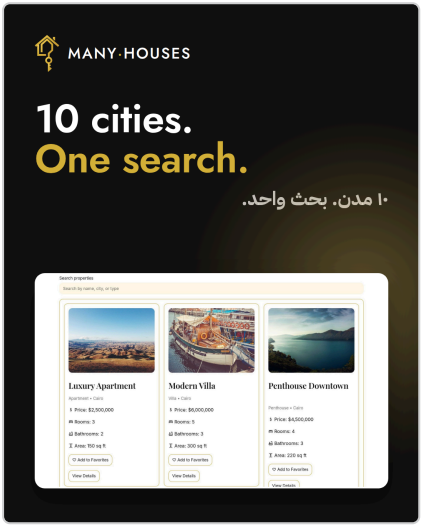

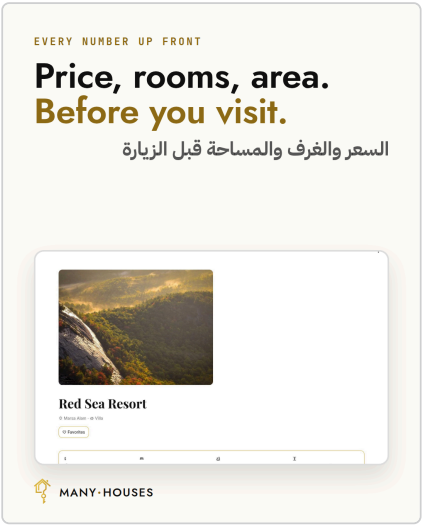

Channel	What we do	Cost
Facebook groups	Post in the city groups where people already look for flats	EGP 0
Instagram	Weekly feed posts and stories from the social kit	EGP 0
Founding partners	Visit brokers and owners with a QR flyer and the live demo	Transport only
Events	Poster and QR code at forums, universities and community events	Printing

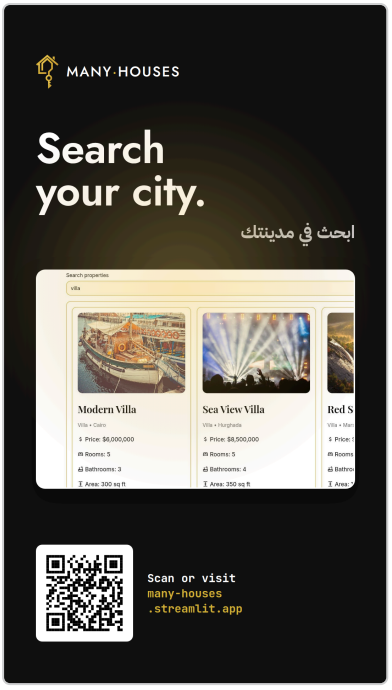

6. Campaign & Content | الحملة والمحتوى

Campaign idea: #MyCityToo (#ومدينتي_كمان): one home from a different city every week, to show that manyhouses is not only for Cairo. Each post ends with the QR code and an invitation to local brokers.

Social kit | حزمة التواصل الاجتماعي

The images are in `docs/social/`, and they are made from real app screenshots.

Launch (Instagram)	Feature (Instagram)	Partners (Instagram)
		

Story: try it	Story: partners	Facebook link
		

Captions | النصوص المرافقة

Post	English caption	Arabic caption
Launch	Homes from Alexandria to Aswan in one search. Try the prototype: many-houses.streamlit.app #MyCityToo	بيوت من إسكندرية لأسوان في بحث واحد. جرّب النسخة الأولى: many-houses.streamlit.app #ومدينتي_كمان
Feature	Price, rooms and area on every card, before you ever visit.	السعر وعدد الأوض والمساحة على كل كارت، قبل ما تروح تعاين.
Partners	Brokers and owners outside Cairo: be one of our first partners. WhatsApp us on +20 100 147 9499.	سمسار أو صاحب عقار برّه القاهرة؟ خليك من أول شركائنا. كلّمنا واتساب على +20 100 147 9499.

Four-week content calendar | جدول المحتوى

Week	Post	Story	Offline
1	Launch	Try it (QR)	Tell friends and family; share in 3 city groups
2	Feature	Try it	Visit 5 brokers with the partner flyer
3	Partners	Partners	The Afro-Asian Forum: poster and QR code at our stand
4	Month one in numbers: visits, top city searched, first partners	Partners	Follow up with the brokers you visited

Demo video (30–45 seconds) | فيديو العرض

Record the real app on a phone. Use the Stories cover (`story-try.png`) as the Reel's cover.

Time	Show	Say
0:00	The Properties screen	"Looking for a home outside Cairo?"
0:05	Type "aswan" in the search box	"Search any of 10 cities by name, city or type."
0:12	Open a property, then its map	"Price, rooms, area, and where it is."
0:20	Tap the heart, then open Favorites	"Save the ones you like."
0:28	Fill in the contract form and download	"Download a contract draft to read before you meet anyone."
0:38	The QR code	"Try it at many-houses.streamlit.app."

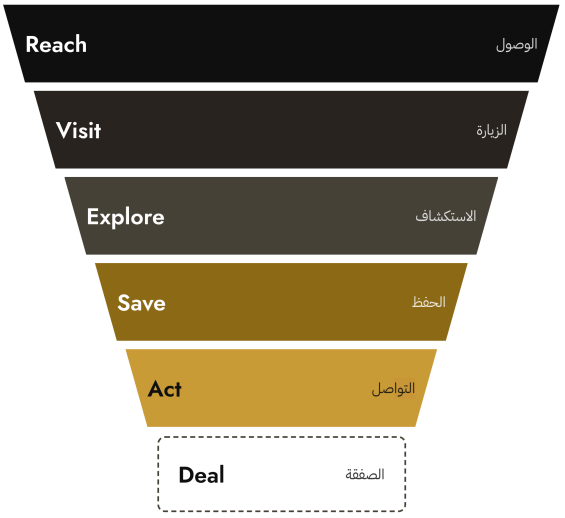

7. Budget, KPIs & Funnel | الميزانية ومؤشرات الأداء

Budget | الميزانية

Item	Cost
Hosting (Streamlit Community Cloud)	EGP 0
Social media posts	EGP 0
Poster and QR flyers	about EGP 600 (estimate: one 1 × 2 m poster and 100 small QR flyers; confirm with a print shop)
Transport to broker visits	about EGP 400 (estimate: microbus fares for 5 broker visits)
Total	**about EGP 1,000** (estimate)

Funnel and KPIs | قمع التسويق ومؤشرات الأداء

The funnel قمع التسويق

People who see a post or a QR code. `Facebook / Instagram insights`

People who open the app. `link clicks · QR scans`

Search, then open a property. `home.py → details.py`

Tap the heart. `favorites`

Download a contract draft or send a message. `contract.py · contact_us.py`

A visit or deal with a partner broker. `next: not built`

WHAT WE COUNT AT EACH STEP

HONEST GAP

The app can't count yet

The steps from Explore to Act happen inside the app, which has no counter today. Social insights and QR scans can be counted from day one. An in-app counter is on the roadmap.

FIRST-MONTH TARGETS

Reach **5,000** · Visit **300** · Explore **150** · Save **60** · Act **20** · founding partners **5**. Only Reach, Visit and partners can be counted today.

Each step keeps only some people from the step above. That is why the bars get narrower. The biggest drop shows where to improve first.

Step	KPI	How we count it	First-month target
Reach	People who saw a post	Facebook and Instagram insights	5,000
Visit	People who opened the app	Link clicks and QR scans	300
Explore → Act	Searches, favorites, drafts	Not countable yet. The app needs a counter (Roadmap).	—
Partners	Brokers or owners who agree to list	A list we keep by hand	5

8. Roadmap & Limits | خارطة الطريق والحدود

The app is a working prototype. Some things it does not do yet. We show them as next steps, not as features.

Today (built)	Next	Later
10 screens, live on the web	Real listings from founding partners	Accounts that keep favorites between visits
12 sample listings in 10 cities	Real photos instead of placeholders	Partners add their own listings
Search, details, map, favorites	Prices in EGP, with installment plans [43]	A visit counter for the funnel
Contract draft download	A "checked by a partner" badge	An Arabic version of the app
Contact form (shows a thank-you)	WhatsApp contact that reaches a person	

Today (built)	Next	Later
When: now	**When:** in 3 months	**When:** in 1 year

Limits today (from the README):

- The 12 listings are samples, and the photos are random pictures from picsum.photos.
- Prices show in US dollars ($), not EGP.
- Sign in and Register only check that the boxes are filled. There are no real accounts.
- Favorites and form input last only while the browser tab is open.
- The Contact us form shows a thank-you but sends nothing, so partners should use WhatsApp, the phone or the email. The testimonials on the About and Welcome pages are sample quotes, so this plan does not use them.
- The contract is a text draft, not a legal document.

9. Student Worksheet | ورقة عمل الطالب

My Project | مشروعي

Student name: Yassin Al Ashry
Academy: Techno Future Academy, Kafr El Sheikh
Project: manyhouses: Marketing Plan

My research | بحثي

What I checked myself (17 Oct 2026): Dubizzle showed 6 property ads in Aswan and Aqarmap 11 for sale, while Dubizzle has about 157k in Cairo [37], [57]. Property Finder's Aswan search showed no Aswan count.

My choices | اختياراتي

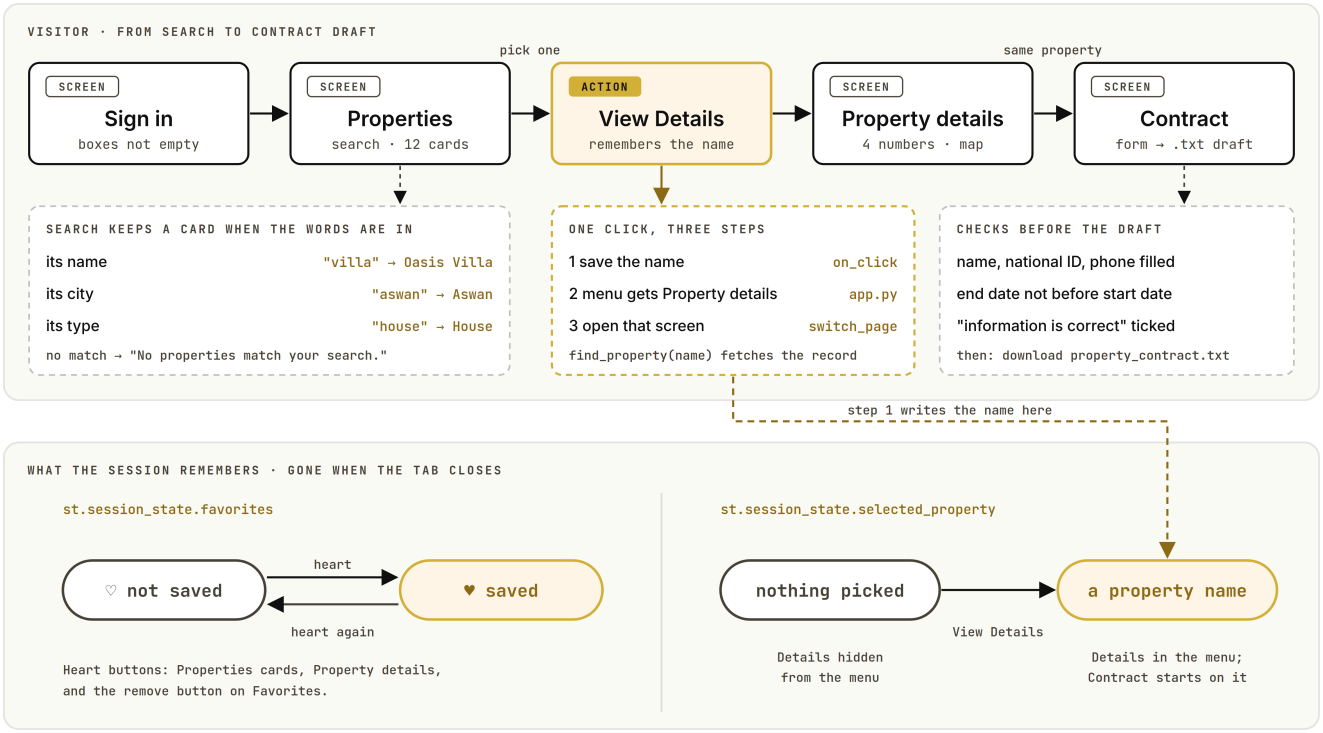

Decision	I chose	Because
Persona	Newly married couples outside Cairo, with brokers as partners	936,739 marriages in 2024 [3], and their cities are the ones the portals skip
Tagline	Every city. One search.	It says the whole idea in four words, and it works in Arabic too
Revenue model	B, then A	Partners bring real listings now; featured listings sell once there is traffic
Campaign idea	#MyCityToo	One city a week gives us a post every week and invites that city's brokers

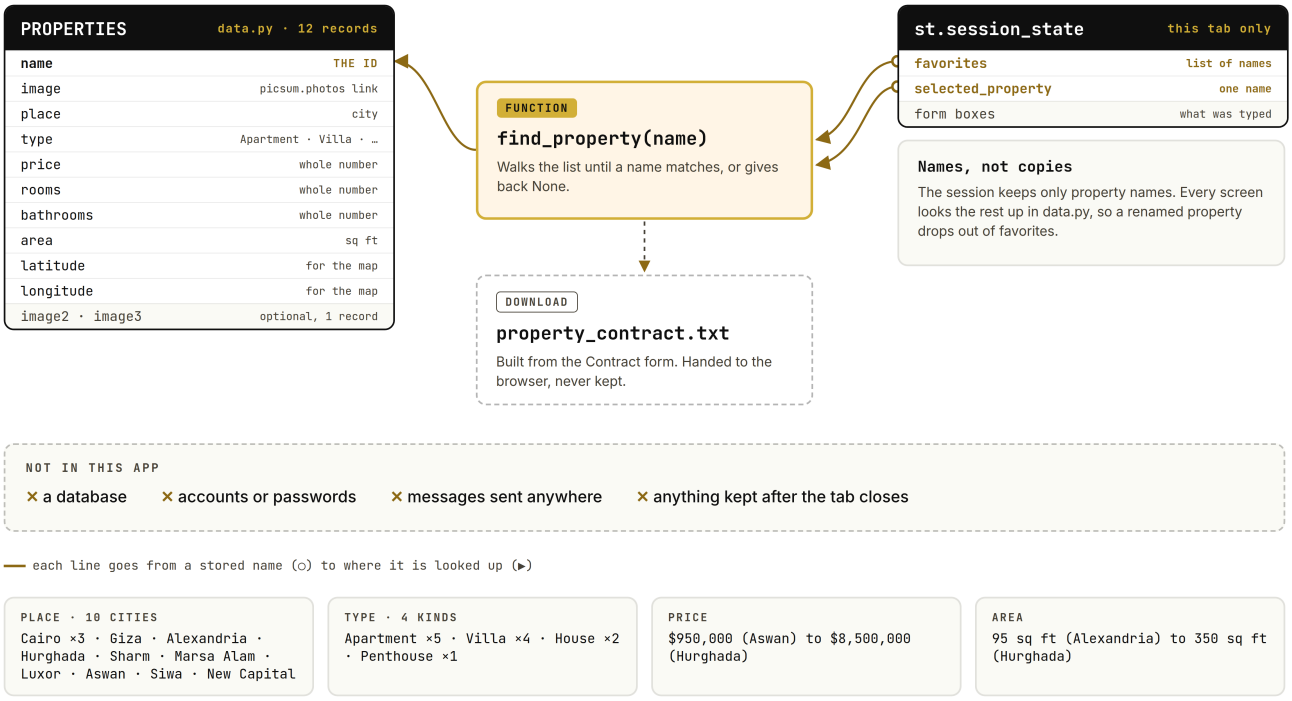

What I Learned | ماذا تعلمت

1. **About marketing:** Marketing starts with one clear person. Once we picked Mona, the tagline, the posts and the channels got much easier to choose.
2. **About my customers:** They search in Facebook groups and through brokers, not only on portals. In Aswan the big portals have only a handful of ads.
3. **The hardest part:** Being honest about what the prototype does not do yet, and turning that into a roadmap instead of hiding it.
4. **If I had more time:** Visit brokers in Kafr El Sheikh and Aswan, add real listings with real photos, and add a visit counter to measure the funnel.

Appendix: How the Product Works | ملحق: كيف يعمل المنتج

The app is one Python program built with Streamlit, its only library. It runs free on Streamlit Community Cloud. The 12 properties live in one list in `data.py`. Favorites and the picked property live only in the browser session.

Sources: every `[n]` in this plan is numbered in `docs/research.md`, with the publisher, date and link.

Try the app: https://many-houses.streamlit.app
